

Lawrence-Mercer Recycling/Solid Waste Department

The Lawrence-Mercer Recycling & Solid Waste Department has a new initiative focused on the recycling of glass products. The “Glass not Trash” program provides the public with an ongoing recycling option for food and beverage containers that supports the manufacturing of new glass. Look for the purple bin at a collection site near you!

Mercer, PA 16137

GLASS RECYCLING RULES

Only glass **food** and **beverage containers** in the form of **glass bottles, jugs, and jars** are acceptable in the purple bins. Examples include your pickle, olive, and relish jars, spaghetti sauce jars, hot sauce bottles, beer, liquor, and wine bottles, and wine jugs.

Do not deposit glass materials in the purple bin that are **not acceptable**. Materials that are not accepted include cut glass, window glass, mirrors, glass bakeware/Pyrex, stemware, crystal, and anything that is not a glass container. Placing unacceptable materials into the bin will ruin entire loads of glass destined for recycling.

USING THE PURPLE BIN

Rinse the containers and remove any caps, corks, and lids.

All colors of glass are acceptable, separating is not necessary.

Take all boxes, bags, or other collection containers with you when done – Do not place any of these materials in the bin.

Please shut the sliding doors when finished.

This publication is funded by a PA DEP 902 Recycling Grant and a grant from the Glass Recycling Foundation.
